

The 10 most important advantages of the Dutch Cloud Storage at vBoxxCloud

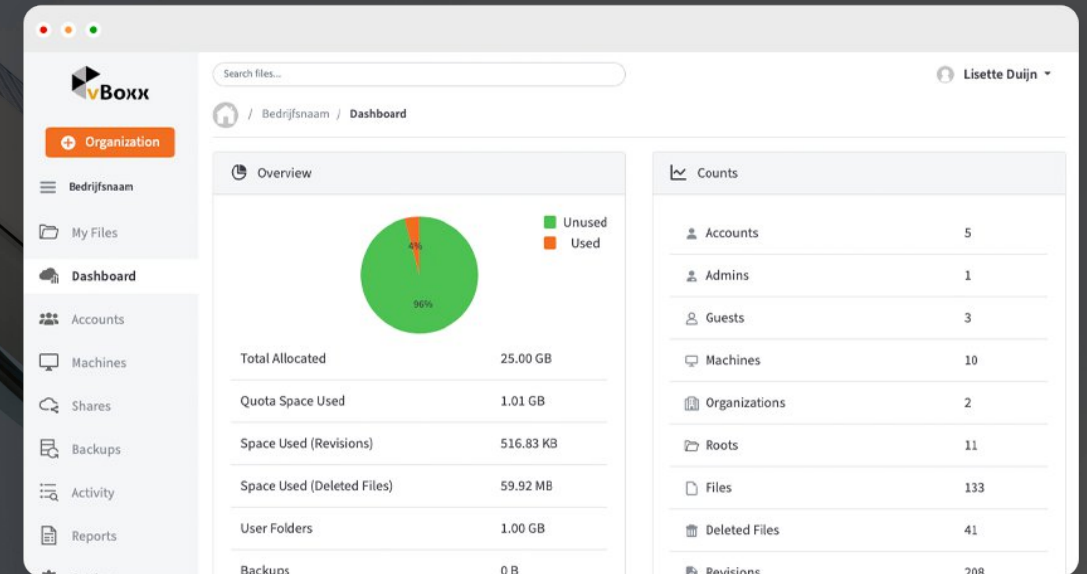

1. Designed for businesses

Unlike free cloud storage services, vBoxxcloud is designed for businesses and organizations, meaning all features and security policies are customized to the business needs.

Features include:

- ↔ Monitoring of different rights per user
- ↔ View activity log
- ↔ Own branding and many more!

2. Files are always close by

You always have access to your cloud via all devices, from anywhere:

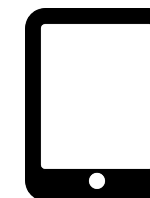

Mobile

Laptop

Computer

Tablet

With our **reliable and quick synchronization**, we guarantee that all your data can be easily and efficiently synchronized to all your devices.

3. Share securely with your colleagues

In the cloud, you can determine which folders users are allowed to view and which rights they are given.

The access rights for cloud users:

- **Collaborator:** work with others via a web browser or sync tool
- **Editor:** same rights as collaborator but can not share files
- **Web editor:** only edit files online, cannot download or sync files
- **Viewer:** can view files locally or online
- **Previewer:** only view the folder structure and preview content
- **Uploader:** can only upload files and folders via the web browser

4. Free guest users

- ✓ Ability to create **guest accounts for free**
- ✓ Securely share files outside your business
- ✓ Guest users can only access the shared files via the web browser
- ✓ Indicate whether the guest user can upload, download or modify files
- ✓ Administrators can easily **manage the activities** of their account

5. Continuous backup

Everything is monitored and the cloud files are constantly backed up.

Have you accidentally deleted a file, or do you want to restore a deleted file or version? No problem. We keep deleted files and versions for you in the cloud. You can specify how long you want to keep those files in the cloud (we recommend 90 days).

Free ransomware recovery feature included:

If your files are under attack by ransomware, you can easily recover your files with our Snapshot feature that recreates a copy of your files.

6. Secured data centers

Your data is safely stored in highly secure data centers in the Netherlands.

- ✓ All your data on our server is encrypted with **256-bit AES encryption**.

- ↔ This way, the data is unreadable to anyone who is trying to access the files.

- The files in vBoxxCloud are **automatically encrypted** and rendered unreadable. You don't have to do anything yourself.
